

What is claimed is:

1. A server on a network, the server operable to:
receive from a first participant via the network a
5 formulation of a problem to be solved;

receive from a plurality of other participants via
the network suggested solutions to the problem; and

distribute portions of an award to those
participants who contribute suggested solutions to the
10 problem.

2. A server according to claim 1, further operable to:
provide tools for use by the first participant for
controlling the distribution of the award to the other
15 participants.

3. A server according to claim 1, wherein the
distributions of the portions of the award are varied over
the course of a development of the suggested solutions for
20 the purpose of guiding the development of a final solution to
the problem.

4. A server according to claim 1, further operable to:
manage a discussion of the problem and the
suggested solutions; and
receive and display the discussion in real time.

5. A server according to claim 1, further operable to:
receive anonymously the formulation of the problem
and the suggested solutions.

6. A server according to claim 1, further operable to:
communicatively couple to a database adapted to
store the formulation of the problem and suggested solutions.

7. A server according to claim 2 further operable to:
store other tools for use by the other participants
for controlling the distribution of the portions of the award
among themselves.

8. A server according to claim 1, wherein if the first
participant has not awarded all of the portions of the award
to the other participants within a predetermined time, at
least some of the remaining portions of the award are

automatically distributed to the other participant who has received within the predetermined time the largest fraction of the award.

5 9. A server according to claim 1, further operable to:
store tools for use by a presenter for controlling the award to the other participants, wherein the distribution of the portions of the award is varied over the course of a development of the suggested solutions for the purpose of guiding the development of a final solution to the problem.

10 10. A server according to claim 9, wherein the other participants are viewers of a television broadcast relating to the formulation of the problem and the suggested solutions and the presenter is a television presenter for the television broadcast.

15 11. A server according to claim 9, where the presenter is selected by the other participants.

20 12. A server according to claim 1, wherein the other participants are anonymous.

13. A server according to claim 2, the tools further adapted to block the further development of a selected suggested solution.

5 14. A server according to claim 2, the tools further adapted to allow the first participant to select one of the suggested solutions and control the discussion and distribution of the portions of the award in the context of the selected suggested solution.

15 15. A server according to claim 1, wherein the formulation of the problem is related to the improvement of company processes.

15 16. A server according to claim 1 further operable to:
receive a selection of at least one competent authority from the other participants on the basis of suggested solutions delivered by the at least one competent authority via the network; and

20 facilitate a private problem resolution discussion between a client and the selected at least one competent authority.

17. A server according to claim 16, wherein the client
is the first participant.

18. A server according to claim 16 wherein the first
participant is an employee of the client.

19. A server according to claim 16, wherein the at
least one competent authority is preselected before the
formulation of the problem is received by the server.

20. A server according to claim 16, further operable
to:

provide a negotiation forum for the at least one
competent authority and the client to negotiate a level of
award to be awarded to the at least one competent authority
for the suggested solution.

21. A server according to claim 4, further operable to
thread the discussions.

22. A server according to claim 1, wherein the first
participant authorizes the level of the amount of each

portion of the award before the other participants send the suggested solutions, thereby finalizing the distribution of the portions of the award.

5 23. A terminal on a network, the terminal operable to:
accept from a first participant a formulation of a problem to be solved;

place the formulation of the problem to be solved onto the network;

10 send onto the network from a plurality of other participants suggested solutions to the problem; and

15 receive off of the network a selection of tools for controlling a distribution of portions of an award to those participants who contribute suggested solutions to the problem.

24. A terminal according to claim 23, further operable to:

20 accept input of data relating to a discussion of the problem and the suggested solutions;

place the data onto the network; and

receive and display other data relating to the

discussion in real time.

25. A terminal according to claim 23, further operable
to:

5 transmit anonymously the formulation of the problem
and the suggested solutions.

26. A terminal according to claim 23, further operable
to:

10 communicatively couple to a database adapted to
store the formulation of the problem and the suggested
solutions.

15 27. A terminal according to claim 23, further operable
to accept another selection of tools for use by the other
participants for controlling the distribution of the portions
of the award among themselves.

20 28. A terminal according to claim 23, further operable
to display and accept selection of tools for use by a
presenter for controlling the award to the other
participants, wherein the distribution of the portions of the

award is varied over the course of a development of the suggested solutions for the purpose of guiding the development of a final solution to the problem.

5 29. A terminal according to claim 23, the tools further adapted to block the further development of a selected suggested solution.

10 30. A terminal according to claim 23, the tools further adapted to allow the first participant to select one of the suggested solutions and control the discussion and distribution of the portions of the award in the context of the selected suggested solution.

15 31. A terminal according to claim 23, further operable to:

20 accept input of a selection of at least one competent authority from the other participants on the basis of the suggested solutions delivered by the at least one competent authority via the network; and

 facilitate a private problem resolution discussion between a client and the selected at least one competent

authority.

32. A terminal according to claim 31, further operable
to:

5 accept input from the at least one competent
authority and the client, the input relating to a negotiation
of a level of award to be awarded to the at least one
competent authority for the suggested solution.

10 33. A system for facilitating problem solving,
comprising:

 a server on a network, the server operable to:
 receive from a first participant via the
network a formulation of a problem to be solved,

15 receive from a plurality of other participants
via the network suggested solutions to the problem, and
 distribute portions of an award to those
participants who contribute the suggested solutions to the
problem; and

20 a terminal on the network, the terminal operable
to:

 accept from the first participant the

00010395-051101

formulation of the problem to be solved,

place onto the network the formulation of the
problem to be solved,

send onto the network from the plurality of
5 other participants the suggested solutions to the problem,
and

receive off of the network a selection of
tools for controlling the distribution of the portions of the
award.

34. A system according to claim 33, wherein the tools
are further adapted to be used by the first participant for
controlling the distribution of the award to the other
participants.

35. A system according to claim 33, wherein the
distributions of the portions of the award are varied over
the course of a development of the suggested solutions for
the purpose of guiding the development of a final solution to
20 the problem.

36. A system according to claim 33, wherein

the server is further operable to:

manage a discussion of the problem and the
suggested solutions in real time; and

the terminal further operable to:

accept input of data relating to the
discussion, and

place the data onto the network.

37. A system according to claim 33, wherein

the terminal further operable to:

transmit anonymously onto the network the
formulation of the problem and the suggested solutions to the
server; and

the server is further operable to:

receive the anonymous formulation of the
problem and the suggested solutions from the network.

38. A system according to claim 33, further comprising:

a database communicatively coupled to the network
and adapted to store the formulation of the problem and the
suggested solutions.

39. A system according to claim 33,

the server further operable to:

store other tools for use by the other
participants for controlling the distribution of the portions
of the award among themselves; and

the terminal further operable to:

display and accept selection of the other
tools.

40. A system according to claim 33, wherein if the
first participant has not awarded all of the portions of the
award to the other participants within a predetermined time,
at least some of the remaining portions of the award are
automatically distributed to the other participant who has
received within the predetermined time the largest fraction
of the award.

41. A system according to claim 33,

the server further operable to:

store tools for use by a presenter for
controlling the award to the other participants, wherein the
distribution of the portions of the award is varied over the

course of a development of the suggested solutions for the purpose of guiding the development of a final solution to the problem; and

the terminal further operable to:

display tools for use by a presenter for controlling the award to the other participants.

42. A system according to claim 41, wherein the other participants are viewers of a television broadcast relating to the formulation of the problem and the suggested solutions and the presenter is a television presenter for the television broadcast.

43. A system according to claim 41, where the presenter is selected by the other participants.

44. A system according to claim 33, wherein the other participants are anonymous.

45. A system according to claim 33, the tools further adapted to block the further development of a selected suggested solution.

46. A system according to claim 33, the tools further adapted to allow the first participant to select one of the suggested solutions and control the discussion and distribution of the portions of the award in the context of the selected suggested solution.

47. A system according to claim 33, wherein the formulation of the problem is related to the improvement of company processes.

48. A system according to claim 33,
the server further operable to:
receive a selection of at least one competent authority from the other participants on the basis of the suggested solutions delivered by the at least one competent authority via the network; and

the terminal further operable to:
accept the selection from the other participants,

wherein the server and the terminal facilitate a private problem resolution discussion between a client and the selected at least one competent authority.

49. A system according to claim 48, wherein the client
is the first participant.

50. A system according to claim 48 wherein the first
5 participant is an employee of the client.

51. A system according to claim 48, wherein the at
least one competent authority is preselected before the
formulation of the problem is received by the server.

52. A system according to claim 48,
the server further operable to:
provide a negotiation forum for the at least
one competent authority and the client to negotiate a level
15 of award to be awarded to the at least one competent
authority for the suggested solution; and
the terminal further operable to:
provide a user interface for the negotiation.

53. A system according to claim 36, the server further
operable to thread the discussions.

54. A system according to claim 33, wherein the first participant authorizes the level of the amount of each portion of the award before the other participants send onto the network the suggested solutions, thereby finalizing the distribution of the portions of the award.

55. An apparatus for facilitating problem solving on a network, comprising:

means for transmitting and receiving from a first participant via the network a formulation of a problem to be solved;

means for transmitting and receiving from a plurality of other participants via the network suggested solutions to the problem;

means for distributing portions of an award to those participants who contribute the suggested solutions to the problem; and

means for controlling the distribution of the portions of the award.

56. An apparatus according to claim 55, further comprising:

means for managing a discussion of the problem and
the suggested solutions in real time;

means for accepting input of data relating to the
discussion; and

5 means for placing the data onto the network.

57. An apparatus according to claim 55, further
comprising:

means for transmitting anonymously onto the network
the formulation of the problem and the suggested solutions to
the server; and

means for receiving the anonymous formulation of
the problem and the suggested solutions from the network.

15 58. An apparatus according to claim 55, further
comprising:

means for storing the formulation of the problem
and the suggested solutions.

20 59. An apparatus according to claim 55, further
comprising:

means for storing other tools for use by the other

09810395-051101
10095-051101
10095-051101

participants for controlling the distribution of the portions
of the award among themselves; and

means for displaying and receiving off of the
network a selection of the other tools.

5

60. An apparatus according to claim 55, further
comprising:

means for controlling the award to the other
participants, wherein the distribution of the portions of the
award is varied over the course of a development of the
suggested solutions for the purpose of guiding the
development of a final solution to the problem; and

means for controlling the award to the other
participants by a presenter.

09/810,395-051101

15

61. An apparatus according to claim 55, further
comprising:

means for receiving a selection of at least one
competent authority from the other participants on the basis
of the suggested solutions delivered by the at least one
competent authority via the network;

means for accepting the selection from the other

participants; and

means for facilitating a private problem resolution discussion between a client and the selected at least one competent authority.

5

62. An apparatus according to claim 61, further comprising:

means for providing a negotiation forum for the at least one competent authority and the client to negotiate a level of award to be awarded to the at least one competent authority for the suggested solution; and

means for providing a forum for the negotiation.

63. An apparatus according to claim 56, further comprising:

means for threading the discussions.

64. An apparatus according to claim 55, further comprising:

means for authorizing the level of the amount of each portion of the award before the other participants send onto the network the suggested solutions.

101
65. A method of facilitating problem solving over a network, comprising the steps of:

transmitting and receiving a formulation of a problem via the network from a first participant;

5 transmitting and receiving from a plurality of other participants via the network suggested solutions to the problem;

10 distributing portions of an award to those participants who contribute the suggested solutions to the problem;

15 controlling with tools the distribution of the portions of the award.

20 66. A method according to claim 65, further comprising the step of:

varying the distributions of the portions of the award over the course of a development of the suggested solutions for the purpose of guiding the development of a final solution to the problem.

20 67. A method according to claim 65, further comprising the step of:

managing a discussion of the problem and the
suggested solutions in real time.

68. A method according to claim 65, wherein
transmitting anonymously onto the network the
formulation of the problem and the suggested solutions to the
server; and

receiving the anonymous formulation of the problem
and the suggested solutions from the network.

69. A method according to claim 65, further comprising
the step of:

storing the formulation of the problem and the
suggested solutions.

70. A method according to claim 65, further comprising
the steps of

storing other tools for use by the other
participants for controlling the distribution of the portions
of the award among themselves; and

displaying and receiving off of the network
selection of the other tools.

71. A method according to claim 65, wherein if the first participant has not awarded all of the portions of the award to the other participants within a predetermined time, automatically distributing at least some of the remaining portions of the award are to the other participant who has received within the predetermined time the largest fraction of the award.

72. A method according to claim 65, further comprising the steps of:

storing tools for use by a presenter for controlling the award to the other participants; and

varying over the course of a development of the suggested solutions the distribution of the portions of the award for the purpose of guiding the development of a final solution to the problem.

73. A method according to claim 41, further comprising the step of:

selecting the presenter by polling the other participants.

74. A method according to claim 65, further comprising
the step of:

blocking the further development of a selected
suggested solution using one of the tools.

5

75. A method according to claim 65, further comprising
the steps of:

selecting one of the suggested solutions; and
controlling the discussion and distribution of the
portions of the award in the context of the selected
suggested solution.

76. A method according to claim 65, further comprising
the steps of:

transmitting and receiving a selection of at least
one competent authority from the other participants on the
basis of the suggested solutions delivered by the at least
one competent authority via the network; and

facilitating a private problem resolution
discussion between a client and the selected at least one
competent authority.

77. A method according to claim 76, wherein the client
is the first participant.

78. A method according to claim 76 wherein the first
participant is an employee of the client.

79. A method according to claim 76, further comprising
the step of:

preselecting the at least one competent authority
before the formulation of the problem is received by the
server.

80. A method according to claim 76, further comprising
the step of:

providing a negotiation forum for the at least one
competent authority and the client to negotiate a level of
award to be awarded to the at least one competent authority
for the suggested solution.

81. A method according to claim 67, further comprising
the step of:

threading the discussions.

82. A method according to claim 65, further comprising
the step of:

authorizing the level of the amount of each portion
of the award before the other participants send the suggested
5 solutions, thereby finalizing the distribution of the
portions of the award.

83. Computer code executable by a microprocessor for
facilitating problem solving on a network, said code
10 comprising:

code for transmitting and receiving from a first
participant via the network a formulation of a problem to be
solved;

code for transmitting and receiving from a
15 plurality of other participants via the network suggested
solutions to the problem;

code for distributing portions of an award to those
participants who contribute the suggested solutions to the
problem; and

code for controlling the distribution of the
20 portions of the award.

84. Computer code according to claim 83, further
comprising:

code for managing a discussion of the problem and
the suggested solutions in real time;

5 code for accepting input of data relating to the
discussion; and

code for placing the data onto the network.

85. Computer code according to claim 83, further
comprising:

code for transmitting anonymously onto the network
the formulation of the problem and the suggested solutions to
the server; and

code for receiving off of the network the anonymous
15 formulation of the problem and the suggested solutions.

86. Computer code according to claim 83, further
comprising:

code for storing the formulation of the problem and
20 the suggested solutions.

87. Computer code according to claim 83, further

comprising:

code for storing other tools for use by the other participants for controlling the distribution of the portions of the award among themselves; and

5 code for displaying and receiving off of the network selection of the other tools.

88. Computer code according to claim 83, further comprising:

10 code for controlling the award to the other participants, wherein the distribution of the portions of the award is varied over the course of a development of the suggested solutions for the purpose of guiding the development of a final solution to the problem; and

15 code for controlling the award to the other participants by a presenter.

89. Computer code according to claim 83, further comprising:

20 code for receiving a selection of at least one competent authority from the other participants on the basis of the suggested solutions delivered by the at least one

09810395-051101

competent authority via the network;

code for accepting the selection from the other
participants; and

code for facilitating a private problem resolution
discussion between a client and the selected at least one
competent authority.

90. Computer code according to claim 89 further
comprising:

code for providing a negotiation forum for the at
least one competent authority and the client to negotiate a
level of award to be awarded to the at least one competent
authority for the suggested solution; and

code for providing a forum for the negotiation.

91. Computer code according to claim 84, further
comprising:

code for threading the discussions.

92. Computer code according to claim 83, further
comprising:

code for storing the formulation of the problem and

the suggested solutions.

93. A server according to claim 6, further operable to:
receive from at least one visitor a quality
assessment of the suggested solutions.

94. A server according to claim 6, further operable to:
determine a quality assessment based on the
portions of the award received for the respective suggested
solutions.

95. A terminal according to claim 23, further operable:
to place on the network from at least one visitor a
quality assessment of the suggested solutions.

96. A system according to claim 33, further operable to
receive from at least one visitor a quality assessment of the
suggested solutions.

97. A system according to claim 33, further operable
to:

determine a quality assessment based on the portions of the award received for the respective suggested solutions.

5 98. An apparatus according to claim 55, further comprising:

 means for receiving from at least one visitor a quality assessment of the suggested solutions.

10 99. An apparatus according to claim 55, further operable to:

 means for determining a quality assessment based on the portions of the award received for the respective suggested solutions.

15 100. A method according to claim 65, further comprising the step of:

 receiving from at least one visitor a quality assessment of the suggested solutions.

20 101. A method according to claim 65, further comprising the step of:

09810395-051101

determining a quality assessment based on the portions of the award received for the respective suggested solutions.

5 102. Computer code according to claim 83, further comprising:

code for receiving from at least one visitor a quality assessment of the suggested solutions.

10 103. Computer code according to claim 83, further comprising:

code for determining a quality assessment based on the portions of the award received for the respective suggested solutions.
